

Raised Air Bed

Raised Air Bed

Raised air beds are air beds can be raised or reclined to a certain degree so that you can sit on the bed for comfortable reading before going to sleep.

Look at this following raised air bed:

The Wenzel Raised Insta-Flex Air Bed with Built-in Pump is raised to be as tall as a mattress providing maximum sleeping comfort. It offers an adjustable seat position, the customized incline/recline positioning makes that half-hour of reading before lights out a pleasure in the night. It features built-in pump for easy inflation and deflation, flocked-top keeps bedding in place, and flex coil construction for sleeping in stable and firm positions. Fully inflated in less than 240 seconds. The deflated mattress rolls and stores compactly in a convenient carry bag for easy transport and storage.
